

# CONTROL PANELS

## Why Us?

*Pro-MEC Engineering Services, Inc. has a UL® 508A listed control panel shop and can build custom cabinets from your design, or our internal engineering and design team can design a cabinet to fit your needs. We have stringent specifications and quality control standards that each control panel must meet before being shipped to the customer.*

## What We Do:

Our skilled control panel technicians can build cabinets ranging from small operator stations to large scale multi-door machine control cabinets. Our services also include installation, start up and turn key installations.
