

BLUEBOX DATA COLLECTION

Why Us?

We understand that maintaining your system shouldn't be a hassle. With an internet connection and BlueBox data collection system, you can see livestreaming data, review collected data, and be assured that your system is running at its optimum efficiency.

Benefits of a BlueBox System:

- Alarm notifications
- Customized user interface
- Custom data points for collection
- Customer specified data collection and storing timeframes
- Upgradable for business growth
- Remote engineering & programming support available by highly qualified employees

Current markets include hospitals, air pollution industry, cannabis, construction and manufacturing. These industries use BlueBox to monitor air quality, pressures and temperatures, as well as humidity.
