

PLASTIC FABRICATION

Why Us?

Pro-MEC Engineering Services, Inc. specializes in thermoplastic fabrication and can engineer your project using a variety of plastics including HDPE, PVC, Polypropylene and Copolymer Polypropylene.

What We Do:

Our internal engineering and design team can draft prints to make your custom project a reality. Our welders adhere to the highest standards in the world, the German DVS 2212. Every weld is handcrafted to be smooth and inspected to ensure the highest quality.

Our Capabilities Include:

- Hood and tank fabrication
- Nutrient tanks and bud sorters
- Air pollution scrubber units
- Onsite thermoplastic fabrication
- Integrated firetruck tank bodies
- Skid units for small fire applications
