

STEEL FABRICATION

Why Us?

Pro-MEC Engineering Services, Inc. can engineer, design and install your steel or metal project with a team of highly qualified welders and installers. Our facility can accommodate custom projects to fit your needs!

What We Do:

Our internal engineering and design team can draft prints or we can use ones already prepared. After print approval, our trained welders can fabricate anything; we specialize in non-standard sizes and designs.

Past Projects:

- Onsite steel work
- Custom mezzanines and catwalks
- Bases
- Cart chassis
- Stairs and railings
- Structural/PE Stamping
