

ELECTRICAL

Why Us?

As a licensed electrical contractor in Michigan and as a general contractor in California, we can demolish and install commercial and industrial systems involving high voltage, low voltage, and control wiring! Our competent team of licensed electricians, apprentices, and controls engineers are NFPA 70E certified and code compliant to current standards.

What We Do:

- Installation of electrical systems and equipment
- Troubleshooting, emergency service, and repair
- PLC and VFD programming
